

Monoclonal Antibody (Mab) NGS sequencing

You want to **save your antibody** for recombinant expression or you want to realize a quick screening of your hybridoma.

Biomnigene provides a NGS sequencing to deliver VH and VL sequences of your antibody.

Fast and confident results

Sequences delivered in 2-6 business weeks.
Any species available (rodents, primates,...).
Any isotypes.
Data delivered encrypted.
Your sequence are your property.

Options

Mab safeguard of dead clones.
FR and CDR délimitation report.

High-throughput capacity
